PRICE LIST FOR FALL 1909

OF  
**GRAPE VINES**  
FRUIT TREES, SMALL FRUITS  
AND  
ORNAMENTALS

**LEWIS ROESCH & SON, - - FREDONIA, N. Y.**

Recent Introductions of Exceptional Merit

THE NEW RED GRAPE "REGAL"

## GRAPES

**Regal** New, red. Exceedingly productive. A one year vine planted in 1901 on the grounds of Mr. M. Crawford, of Ohio, ripened ten clusters in 1902 and 110 in 1903, the largest weighing 14 ounces. Very vigorous, healthy and hardy. The clusters are medium to large and very compact. Berries large, dark red, juicy; skin thin but tough. Pulp tender releasing seeds easily. Of ironclad hardiness, having endured 36° below zero without injury.

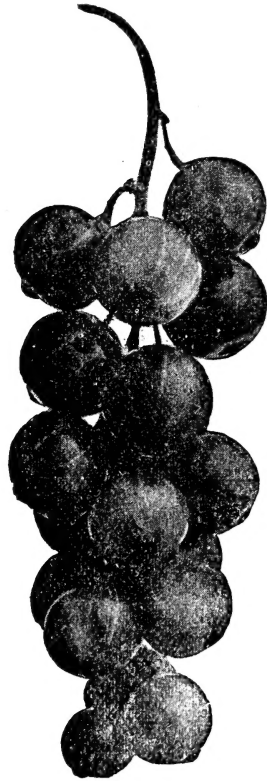

## GRAPES—Continued

### King

New. Originated near Grand Rapids, Mich. Supposed to be a seedling of the Concord. It is of the same color and flavor but more tender, less seeds and ripens a trifle earlier. Bunch and berry very large and very compact. Wood hard and very short jointed. Highly recommended for home use and local market. Awarded medals by both the St. Louis and Pan-American Expositions. Also drew highest awards at State and district fairs wherever shown.

### McKinley

New, white. A cross between Niagara and Moore's Early. It ripens with the latter and is equal to the former in growth and productiveness. Bunch and berry large. Very sweet and of high quality. A good shipper and remarkable keeper. Will keep on vines for weeks after ripe.

PERFECTION CURRANT

## CURRANTS

### Perfection

New, red. A cross between Fay's P. and White Grape, but superior to either in size of bunch and berry, quality and productiveness. The only small fruit ever awarded the Gold Medal by the Western New York Horticultural Society.

## RASPBERRIES

### Black Diamond

Probably the most popular blackcap among market growers. Its great vigor and hardiness, productiveness, large, rich and jet black color bring it in great demand. Equally valuable for evaporating, canning, market and home use.

## BLACKBERRIES

### Blowers

Originated here in the Chautauqua "Grape Belt," and is, no doubt, the most productive blackberry known. 2694 berries have been grown on one bush, and 2720 quarts on  $\frac{1}{8}$  acre. Of good size and quality. Jet black and a good shipper.

### Mercereau

Probably the hardiest blackberry known, having stood without protection and uninjured 20 degrees below zero. It is also a strong upright grower and a great bearer of extra large, brilliant black berries that retain their color. Sweet, rich and melting, without core. A very promising fruit for home use and market.

## SHRUBS

### Althea, Meehanii Variegata

This grand, new variegated leaved Althea shows the same white and yellow variegation on green leaves as the old variety, but it opens its flowers wide, while in the old variety the flowers never open but appear only as purple buttons on the bush. The flowers are single and of a beautiful pinkish purple color, the plant blooming profusely. The contrast of color between the flowers and the silver variegation of the leaves makes the bush very striking in appearance. The flowers are from  $3\frac{1}{2}$  to 4 inches across and the plant begins to bloom when quite small. Hardy wherever any Althea succeeds.

HYDRANGEA ARBORESCENS STERILIS (Hills of Snow)

**Hydrangea Arborescens Sterilis** (HILLS OF SNOW). This superb new Hydrangea is a variety of the hardy native species *H. arborescens*, commonly found "wild" in most of the states east of the Mississippi river. The *sterilis* is likewise absolutely hardy and is, moreover, of easy culture and an exceedingly prolific bloomer. A five-year-old plant has produced one hundred and twenty-six perfect blooms at one time.

The size of the flower is one of the striking features of this shrub. Twelve-inch blooms are frequent on young plants, while the average size on matured plants is usually six inches or more.

The color of the flower is a pure snowlike white, without the creamy and later pink tints that are characteristic of the *H. paniculata grandiflora*. The length of time this whiteness is retained depends somewhat on local conditions, but usually from four to five weeks, when the flowers begin to change slowly and gradually to a light green color, and by October the foliage and flowers are of a similar shade. The flower clusters remain intact long after the leaves have fallen, and frequently throughout the following winter.

This Hydrangea gives every promise of becoming even more popular than the well known *H. paniculata grandiflora*, as it lacks the coarseness and stiffness of that variety; it is refined in tone and effect, and with its abundant and handsome foliage it lends itself readily to landscape effects. It is a comely, handsome shrub at all times. It reaches a height of five or six feet, and when in full bloom is one of the most striking as well as the most beautiful shrubs of its season, suggesting the descriptive synonym referred to in Bailey's "Cyclopedia of American Horticulture," viz: "Hills of Snow."

**Philadelphus, Purpurea Maculata** A purple spotted Mock Orange of recent introduction. Of compact growth, three to four feet in height. Its flowers are flat, pure white with bright purple center. Its exquisite perfume cannot be surpassed, and we know of no flower to equal it in this respect. June.

# HARDY DUTCH BULBS

## For Fall Planting Only

These offer more enjoyment and gratification for the money and trouble invested than almost any other flower.

1st—They cost but little to start on and last for many years without replanting.

2nd—They bloom early in the season when flowers are scarce.

3rd—They furnish such a mass of gay colors with but little foliage and no brambles or thorns. Many of them are very fragrant also.

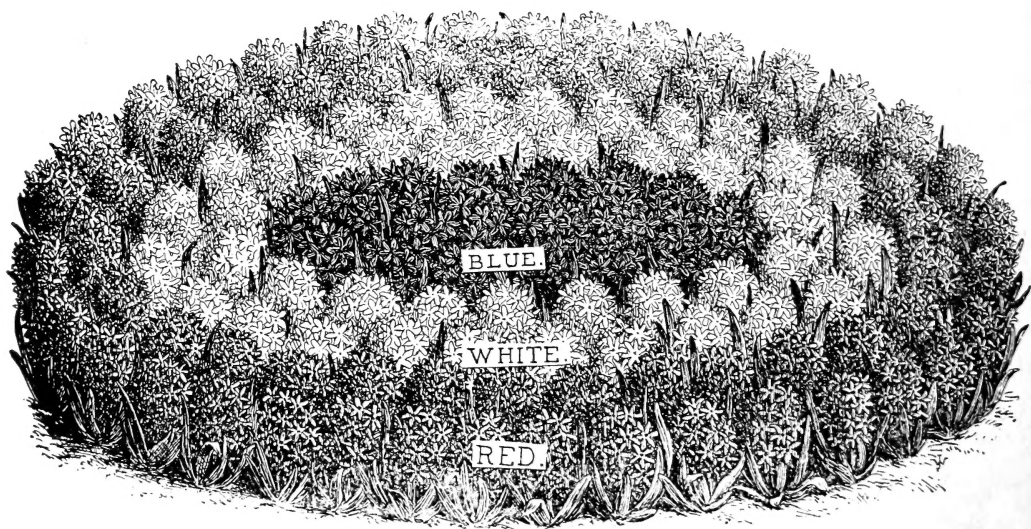

4th—They are prompt in their habits. Bloom for some five weeks early in spring; then the leaves dry up early in June and make room for annuals or bedding plants the rest of the season.

5th—They can be grown in the house in pots or boxes of earth or even in water as well as in the garden, and they are better adapted for that purpose than any other flower.

Plant them any time during September, October, and up to the middle of November at the North and during November and December at the South. Plant Hyacinths and Narcissus some 6 inches apart and 4 inches deep. Tulips 4 inches apart and  $2\frac{1}{2}$  inches deep. Crocuses 2 inches apart and  $1\frac{1}{2}$  inches deep. Plant in good soil and where water drains off readily. Although hardy, the protection of a little barnyard manure is desirable.

For the house, plant in pots or boxes so the tops of bulbs are even with the surface. About three Hyacinths or Narcissus to a 6 inch pot, 6 Tulips or 12 Crocuses. Set them in a cool, dark place for some 6 weeks to root, after which bring them to the light to grow and bloom.

We offer first class Bulbs only. No satisfaction in small, cheap Bulbs. We also prepay all transportation charges. Remember this when comparing prices with those of other houses.

**Hyacinths** In separate colors but unnamed we have them very good and cheap, and we heartily recommend them for both house and garden culture.

We offer large, sound, first class bulbs of Single Hyacinths in following separate colors: Dark Red, Pink and Rose, Pure White, Blush White, Dark Blue, Light Blue and Yellow, also the same colors in Double Hyacinths.

All at 7c each, 60c per 10 and \$4.50 per 100.

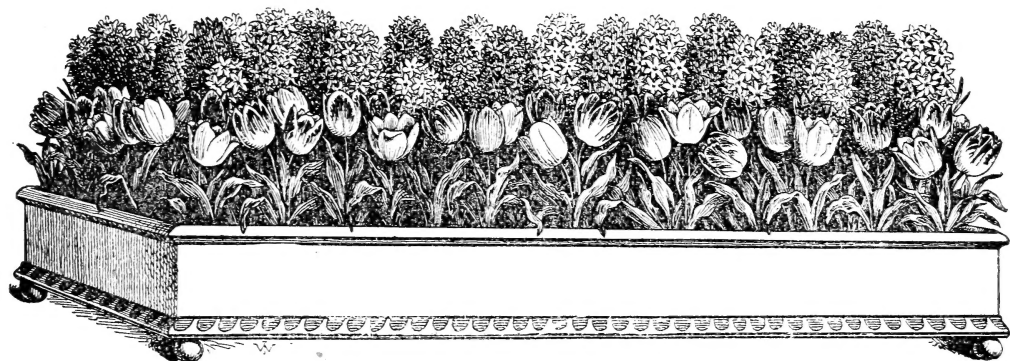

To make a round bed 6 feet in diameter, as here illustrated, requires 127 bulbs, viz.: 19 blue in the center, 42 white and 66 red for the outside. We will furnish these for \$5.40.

# SUPERFINE TULIPS

- Tulips** **SINGLE EARLY**—In separate colors as Dark Crimson, Rose, Scarlet, Yellow, Pure White, Carmine, Gold Striped. All at 25c per 10, \$2.00 per 100.
- DOUBLE EARLY**—In separate colors as above at 25c per 10, \$2.00 per 100.
- EXTRA FINE MIXED**—Either single or double at 25c per 10, \$2.00 per 100.
- LATE SHOW**—In extra fine mixture at 25c per 10, \$2.00 per 100.
- PARROT**—A superfine mixture at 20c per 10, \$1.50 per 100.

A circular bed of Tulips 5 feet across planted 4 inches apart in three colors would require for the first three rows in the center, say 36 crimson, next two rows 54 yellow and last two rows 78 white. Total 168 bulbs. These we will furnish in choice stock, either Single or Double Tulips, for \$3.00.

## Narcissus

**DOUBLE**—Popularly known as Daffodils. White, yellow or mixed,  $3\frac{1}{2}$ c each, 30c per 10, \$2.50 per 100.

**LARGE TRUMPET**—Single. White, yellow or mixed,  $3\frac{1}{2}$ c each, 30c per 10, \$2.50 per 100.

**POET'S**—White with scarlet eye. Sweet scented, 3c each, 25c per 10, \$2.00 per 100.

**POLYANTHUS**—(Paper White Grandiflorus). The best for growing in water. Superior to the Chinese Sacred Lily in size, color and fragrance. 4c each, 35c per 10, \$2.50 per 100.

**POLYANTHUS**—Extra fine mixed colors, 4c each, 30c per 10, \$2.50 per 100.

EASTER LILY

## Lilies

All suitable for pot as well as garden culture.

**AURATUM**—(Gold banded). 4 feet. July 15th. 20c each, \$1.60 per 10.

**CANDIDUM**—(Madonna Lily). White and very fragrant. 3 feet. July. 12c each, \$1.00 per 10.

**HARRISII**—(Easter Lily). Pure white, very early and fragrant. 3 feet. July 1st. 25c each, \$2.25 per 10.

**JAPONICUM LONGIFLORUM**—White, long, trumpet shape. 2 feet. July 20th. 15c each, \$1.25 per 10.

**SPECIOSUM ALBUM**—Pure white Japanese Lily. 3 feet. August 15th. 20c each, \$1.85 per 10.

**SPECIOSUM RUBRUM**—White and rose with dark crimson spots. 3 feet. August 15th. 20c each, \$1.75 per 10.

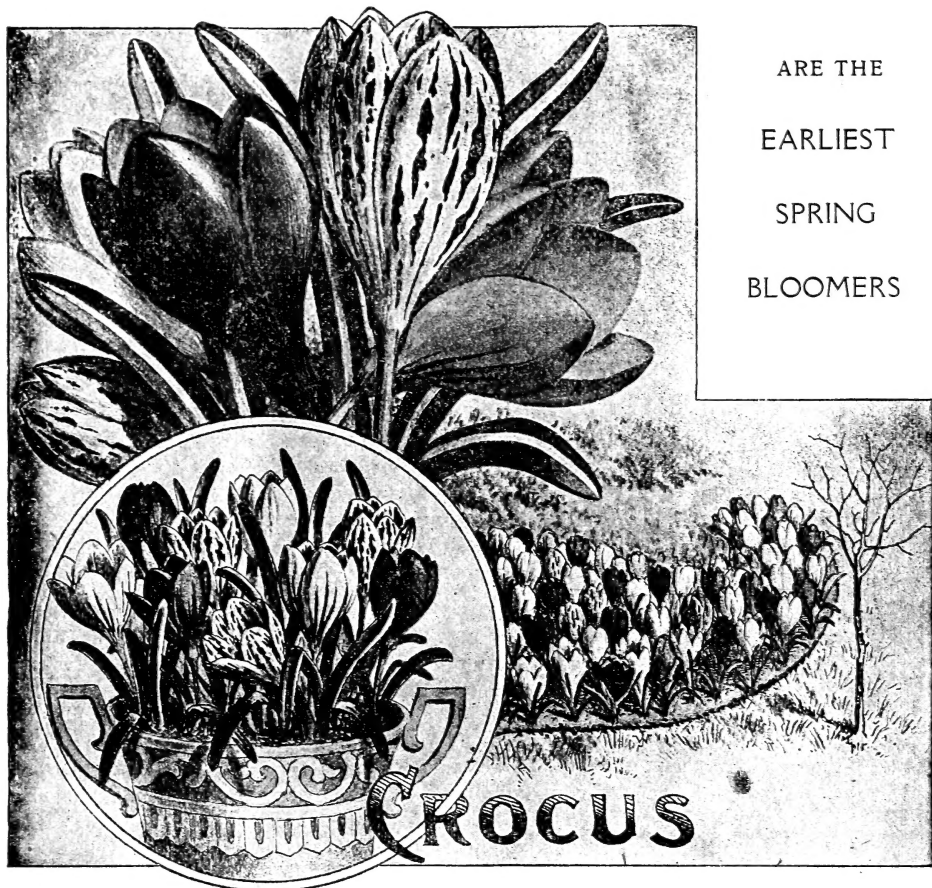

**SPECIOSUM MELPOMENE**—Crimson with white border and spotted with blood red. 3 feet. August 15th. 20c each, \$1.85 per 10.

**TENUIFOLIUM**—Dazzling vermilion scarlet. One of the finest and earliest to bloom.  $1\frac{1}{2}$  feet. 20c each, \$1.85 per 10.

**TIGRINUM fl. pl.**—Double Tiger Lily. 5 feet. August 15th. 15c each, \$1.25 per 10.

# THESE LITTLE GEMS

ARE THE  
EARLIEST  
SPRING  
BLOOMERS

## Crocuses

Large flowered. Blue, white, yellow, purple, striped and variegated  
Each color separate, 10c per 10, 60c per 100. All colors mixed, 10c per  
10, 60c per 100.

A circular bed 4 feet in diameter planted 2 inches apart in four colors would require, say  
4 rows blue in center 60, next three rows white 108, 3 rows striped and variegated 162 and  
2 rows yellow 138. Total 468 bulbs.

We will furnish the whole lot of choice, sound bulbs for \$3.00.

## Colchicum

Or Autumn flowering Crocus, is a curious and interesting flower. The  
leaves appear in Spring and die; the flowers come in the Autumn  
without leaves. Each bulb produces generally 6 to 8 flowers.

**Single** flowering bulbs, 8c each, 70c per 10.

**Double** flowering, 12c each, \$1.00 per 10.

ON DUTCH BULBS WE PREPAY ALL TRANSPORTATION CHARGES.

# Fall Planting

As a rule fall is much the best time for planting hardy trees, vines, shrubs and bulbs, and we can and do ship them all through October and November. We recommend, however, that they be left standing in the nursery up to October 15th to ripen and harden. When planted in the fall, the cut ends of the roots callous by spring; the winter's rains and snows settle the soil closely around the roots and the tree is ready to start to grow early and with vigor. Do not trim the tops of trees in the fall, but do so early in spring. It is also well to bank the soil high around the trees and plants as a protection to the roots and to prevent too much swaying in the wind. This applies to all stock offered herein except strawberries, black raspberries, dewberries and perhaps peaches. These do not do as uniformly well, planted in the fall, as other stock.

Another thing in favor of fall planting is that the weather is usually better, the soil dryer, and you have more leisure than in spring. But if the weather is wet and you are finally obliged to plant in the mud, if at all, the winter's frost will pulverize the soil again; while if you plant in the mud in the spring, the ground will be hard and uncongenial all summer.

After fall planting the next best time is early spring. Plant as early as the ground is dry enough to work well, especially strawberries and black raspberries. Late spring planted stock may do well if the weather is favorable; but if it should turn hot and dry early, as it sometimes does, the stock will certainly suffer, even if it does not die. For this reason it is a good plan to get the trees and plants in the fall, even if you do not plant until spring. Heel them in as recommended below, and have them on hand to plant whenever you are ready.

**CARE OF STOCK WHEN RECEIVED**—When the stock arrives, unpack and plant at once. Should it, however, appear frozen, do not unpack, but cover it up in a cool, dark cellar or other convenient place where it may thaw out gradually. Freezing does not injure plants, but rapid thawing with exposure to air and light does. If not ready to plant when received, heel them in, in a dry place, protected both against sun and sweeping winds. Dig a trench deep enough to hold the vines, plants or trees, open the burlap and spread them out against the side of the trench an inch or two thick; cover them with a layer of soil, which press against the side of the trench to exclude air; and put on another layer of stock and soil, etc., until completed, taking great care to keep the different varieties separate and well labeled. If the vines and plants are left to be heeled in over winter, both root and top must be well covered with earth, and over that place a cover of coarse horse manure or other litter to insure safety. Trees are heeled in leaning with the prevailing wind at an angle of 30 to 40 degrees and buried one-third to one-half of their length. The balance may be covered with evergreen boughs or other brush, but nothing that would attract mice.

---

**FUMIGATING**—There are no San Jose Scales in our Nursery. Still the laws of some states require the fumigation of nursery stock with hydrocyanic acid gas, and the commissioner of this state recommends it. On this account we have built a fumigation house of the most approved pattern, where we will fumigate the stock free of charge for all those who need or desire it.

---

A COPY OF CERTIFICATE OF INSPECTION will be attached to each shipment.

---

 **DESCRIPTIVE CATALOGUE** mailed free upon application.

# Terms and Conditions

5, 50 and 400 at 10, 100 and 1,000 rates respectively; 10, 100 and 1,000 may be made up of not to exceed 3, 10 and 20 varieties respectively. Small fruits, not over 4 varieties to the 100. Strawberries not over 2, nor over 5 varieties to the 1,000.

**FREIGHT PREPAID**—Orders of \$10.00 or over, with a remittance for full amount, will be sent freight paid to any shipping point in the states of New York, Pennsylvania, Ohio, Michigan, New Jersey, Delaware, and all the New England states except Maine. Also to the following shipping points: Wheeling, W. Va.; Louisville, Ky.; Indianapolis, Ind.; St. Louis, Mo.; Chicago, Ill.; Portland, Me.; Richmond, Va., and Baltimore, Md. Also to the following points if one-tenth is added to the price of the stock, viz.: Raleigh and Wilmington, N. C.; Charleston S. C.; Savannah, Ga.; Jacksonville, Fla.; Chattanooga, Tenn.; Kansas City, Mo.; Omaha, Neb.; and St. Paul, Minn. From these points to destination the purchaser pays the freight on receipt.

**POSTPAID**—At single and ten rates the following will be mailed postpaid: Grape Vines, Small Fruits and small plants of Ornamental Shrubbery. Also small trees, cut back, at the single rate of the largest size priced. Inasmuch as postage on vines and plants to the Pacific States and some other distant points is cheaper than express charges we often get orders for hundreds and thousands of vines and plants to be mailed. This we do when postage is added to the price, according to the following table:

Postage	Per 50	Per 100	Postage	Per 50	Per 100
Grapes, Currants and Goose-			Blackberries . . . . .	\$0.30	\$0.50
berries, 2 year, No. 1 . . .	\$0.80	\$1.50	Strawberries . . . . .	.15	.25
The same, 1 year, No. 1 . .	.55	1.00	Asparagus, 2 year . . . .	.30	.50
Raspberries . . . . .	.25	.40	Asparagus, 1 year . . . .	.20	.35

Our vines and plants are very strong, hence the large amount of postage required. The postage on No. 2 grape vines, gooseberries and currants is but two-thirds as much as on No. 1.

**CLUB ORDERS**—Parties requiring but a few plants or vines are invited to take advantage of our offer to send \$10.00 worth, freight paid, by clubbing in with or taking orders of their neighbors.

**CLAIMS** of any kind must be made within five days after receipt of goods. Those made after a lapse of ten days will not be entertained.

**TERMS**—Cash with order. Remit by postal or express order, bank draft, or registered letter at our risk. Money loose in ordinary letters is at the risk of the sender. Individual checks for less than \$50 must be made out for 15 cents extra to cover exchange. \$5 or more sent C. O. D. by express or freight, if desired, provided that one-quarter of the amount, but not less than \$2.00, accompanies the order.

**OUR GUARANTEE**—We guarantee all our stock true to name and of quality represented, to this extent—that should any prove otherwise we hereby agree, upon proper proof, to refund the money received for the same, or else replace with others that are true. But we are not liable for damages other than herein named.

**OUR REFERENCES**—Regarding our reliability and responsibility we would refer you to the Citizens Trust Co., Bank of Fredonia, Postmaster, Express Agent or any public man or institution here. When inquiring do not forget to enclose a self-directed and stamped envelope for reply. Your own banker may also be able to give you our standing from the Mercantile Reports.

# PRICE LIST OF GRAPE VINES, ETC.

*Of Grapes, Currants and Gooseberries we furnish Cuttings at  
1-10 the price of 1 year No. 1 plants; 1 year No. 2  
plants at 2-3 the price of one year No. 1;  
3 year No. 1 plants at 1-2 addi-  
tional to price of 2  
year No. 1.*

- Collection No. 28** 4 Hybrid Perp. Roses and 2 Climbers, one of a kind, our selection, for \$1.00.

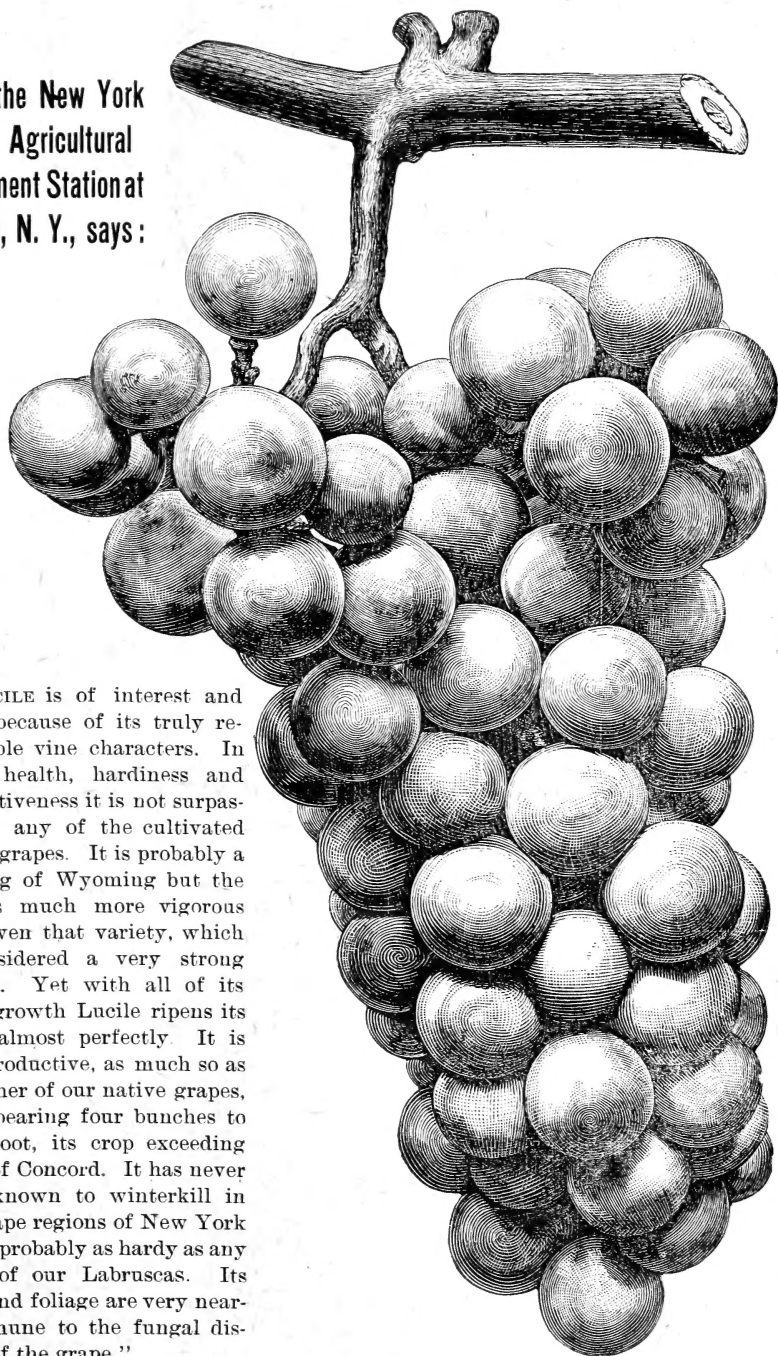

# THE LUCILE GRAPE.

What the New York  
State Agricultural  
Experiment Station at  
Geneva, N. Y., says :

"LUCILE is of interest and value because of its truly remarkable vine characters. In vigor, health, hardiness and productiveness it is not surpassed by any of the cultivated native grapes. It is probably a seedling of Wyoming but the vine is much more vigorous than even that variety, which is considered a very strong grower. Yet with all of its great growth Lucile ripens its wood almost perfectly. It is very productive, as much so as any other of our native grapes, often bearing four bunches to the shoot, its crop exceeding those of Concord. It has never been known to winterkill in the grape regions of New York and is probably as hardy as any other of our Labruscas. Its fruit and foliage are very nearly immune to the fungal diseases of the grape."

## THE LUCILE.

### The Coming Red Market Grape.

The LUCILE yields as much or more than Concord, Niagara or any other well known market grape. Hardy and healthy as any grape, and much more so than Niagara. A strong, robust grower and ripens its wood to the tip under a load of fruit, under which the Niagara would not ripen one-half.

The LUCILE ripens between Moore's early and Worden, just in time to pack with Diamond and Worden; an excellent trio of our National colors—red, white and blue.

The LUCILE is sweet, and in quality compares favorably with that of Wyoming Red, which it also resembles in color. But its crowning glory is the size and compactness of its clusters which resemble those of Diamond and Pocklington, but even larger. While it is an excellent market grape anywhere, it is indispensable at the extreme North where only early and extra hardy varieties succeed.

The LUCILE is a good shipper and never drops its berries, but where the season is long enough it gradually dries up into raisins on the vines

## WHAT OTHERS SAY.

LEWIS ROESCH, Sir:—Lucile grape is doing well. The bunches are the largest of any grape I have, and the vine is hardy. PERU, Ind., April 8, 1905.  
Yours truly, JACOB F. WITTELL.

LEWIS ROESCH, Dear Sir:—I have tried the varieties mentioned (Early Daisy and Lucile) and find they do splendidly. KEREMEOS, B. C., Feb. 5th, '06.  
Yours respectfully, FRANK RICHTER.

LEWIS ROESCH, Dear Sir:—My Luciles were fully ripe Sept. 5th last season. My neighbors have got to get a wiggle on to beat it. \* \* \* I guarantee the Lucile to ripen in Maine. MEDFORD, Mass., March 7, '07.  
Yours truly, CHAS. W. LIBBY.

LEWIS ROESCH:—Vines I got of you two years ago (Lucile, Worden and Diamond) bore well this year. The Lucile was pronounced the best ever shipped into Tacoma market. \* \* \* Lucile is the best shipper, best bearer, best keeper and just as good flavor, etc. (as Worden and Diamond) TACOMA, Wash., Nov. 17, '08.  
DR. P. B. WING.
